

TEACHING IN SCHOOL BASED ON GENDER APPROACH

Barotova Shohsanam Baxtiyor Qizi

Samarkand State University,

Doctoral Student in the Field Of History and Pedagogical Doctrines

Abstract:

For the first time in our legislation, the concept of gender has been defined. Gender is a social aspect that manifests itself in the life and social spheres of the relationship between women and girls. The lexical meaning of gender is Latin genius. Gender is aimed at separating the place of women and men in society.

Keyword: Gender, work, opportunities necessary, education, effectiveness, information, school, factor, student, advantages, technology

In finding and defining the place of women and men society, the stay has created various opportunities for them. The opportunities will be the basis for ensuring gender equality.

In our country, necessary conditions have been created for the upbringing of a spiritually mature generation. The state program of the development of school education is a clear proof of this. The main factor is improving the effectiveness of education is a multimedia resource. The advantage of information communication technologies is that it encourages the reader to think independently. Encourages students to work on themselves and independently.

Teaching them to apply their skills effectively in the classroom increases the effectiveness of the lesson. One of the main task today is the educate Students to a personal professional social life. Special emphasis should be placed on the employer skills when problematic situations arise. The rules of the mother tongue and literature in cultivating this quality in students is great. No matter what professional persons has, if he approaches his work diligently and kindly, he will master the secret perfectly. If a Teacher loves and educates children, his knowledge will grow and become stronger. For many years, a great deal of work has been done to teach English and to make it known as our mother tongue. There are lessons using computer technologies, visual aids, games to teach new approaches using innovative methods. It is also important to remember that pronunciation of teacher plays a great role. The teacher, who is waiting for the correct pronunciation from the learner, must firstly speak fluently in English. In some cases, the student who knows the formulas and rules cannot speak fluently. This is because there is no English environment at home and among friends. Therefore, many parents give their children to English courses. In fact that there are stages in the courses and they lost their interest to learn language.

The rule of advantaged pedagogical technologies in becoming a broad-minded person who respects the opinion of others is invaluable. Teaching using interactive methods provides students with independent acquisition of comprehensive scientific and theoretical knowledge. In interactive ways, the Teacher should create an environment in which students can acquire

knowledge independently and perfectly. You can come to this conclusion yourself, without any research whatsoever, once you tried to travel on your own without an all-inclusive package tour. Have you ever traveled to Africa or Turkey on your own? About 200 km away from popular tourist destinations and, voila, there is no English. There is a native language, and there are other foreign languages. That is why it is important to study a second (third, fourth) foreign language. Believe me, they can come in handy

The use of new pedagogical technologies makes the student an active participant in the learning process. The use of computer games and the internet attracts the attention of e-textbooks reader more. The innovative method of teaching requires of teaching of interview methods in the discussion of debating mental attacks observation. During the course of the lesson, teaching methods techniques will change. In a non-traditional lesson the student's personality comes first. The teacher moves is a one on one interactive manner with the student. We must explain and show what opportunities will give us English language, how it is necessary to learn English language as well as improve their Oral speech. In fact the cartoons and movies help us to improve Oral speech.

Conclusion:

In the organization of interactive lessons, the teacher's oratory skills attract the student's attention. That is way teaching is recognized as beautiful and honorable profession. In a educator creative is formed through learning to work on onerself. However by the end of the school year, high results are not observed in the mastering of subjects by future teachers. Many students lost interest in learning. The prevent this, educators should organize the lesson by encouraging students with pleasure.
