Annotation: A modern teacher is a person who has pedagogical and psychological knowledge, as well as specialized knowledge in various disciplines, in addition to knowledge in their field.

Keywords: Person, science and technology, teacher, vocational training, students, educational activities

Introduction

The implementation of the ideas of the "National Program of Personnel Training" depends on the success of the ongoing reforms in the education system of the republic, the morale and professionalism of teachers, educators, production masters working in educational institutions. liqdir. The work of educating a person is an extremely complex process of activity, and from time immemorial, leading members of society have been involved in this activity. This situation means that the upbringing of the younger generation, the content of its organization is important not only in determining the maturity of the individual, but also the development of society.

In the XXI century, the role of the teacher is improving. Nowadays, global changes, science and technology and the daily development of information and communication technologies require a teacher to have high skills, sharp will, psychological strength, deep knowledge and thinking.

A modern teacher, in addition to knowledge of his specialty, has pedagogical and psychological knowledge, as well as special knowledge in various fields of science, professional training, high moral qualities, working in educational institutions. is a person. In this regard, the following duties and responsibilities are currently required of teachers:

1. A teacher is, first and foremost, a responsible educator, an experienced speaker, and a promoter of culture and enlightenment.
2. A teacher should be able to love students by nature, to be able to connect their love and feelings with the inner world of students at any time, and to earn their love and respect.
3. The teacher must have a deep understanding of the changes taking place in the social life of society, the essence of the ongoing socio-economic reforms and be able to constantly evaluate them objectively and constantly provide students with accurate information in this regard. .
4. The modern teacher is required to be aware of the innovations and achievements of science, technology and information and communication technologies.
5. The teacher must have a deep and thorough knowledge of his specialty, master the integration of all disciplines, while conducting continuous research on himself.
6. The teacher must have a thorough knowledge of the basics of pedagogy and psychology, organize educational activities, taking into account the age and psychological characteristics of students.
7. The teacher should be able to effectively use the most effective, modern forms, methods and tools of education and upbringing in their professional pedagogical activity.
8. A teacher is a creative person, an initiator of educational activities and a person responsible for the future of the younger generation.
9. In the course of his professional activity, the teacher must have a high level of pedagogical skills, communication skills, in-depth mastery of the rules of pedagogical techniques (speech, facial, limb and body

movements, facial expressions, pantomime, tact). 10. The teacher should have a culture of speech, his speech should reflect the following characteristics:

free from various dialects and expressed only in literary language;

-teacher's speech should be simple, fluent and clear;

- be able to use wise words, phrases and proverbs, proverbs and quotations.

11. The culture of the teacher's dress is unique, that is, simple, neat, elegant dress, the use of various ornaments (gold, silver jewelry) that quickly attract the attention of the student in the educational process, season, age, body structure, facial features, and even hair color and style.

12. The teacher is the main organizer of the class community in the educational institution and the most active participant in the ongoing reforms in the field of education.

13. The teacher must not forget that he is an active participant in the process of pedagogical communication. Therefore, in his professional activity it is necessary to constantly develop a number of qualities of pedagogical skills.

14. The teacher must, first of all, be thoughtful, calm, able to correctly assess any pedagogical situation and be able to independently resolve existing conflicts.

Teachers need to keep in mind that in communicating with students, parents, and peers, it is important to be clear and concise. In dealing with them, they should not start by quoting arguments about negative situations, but rather acknowledge the success of students (or colleagues, parents) and organize communication in a way that gives them confidence to enrich themselves. In the process of communication, the teacher's words should show kindness, sincerity, friendliness and good mood to the interlocutor.

A teacher's image that meets these requirements will ensure that he or she is respected by his or her peers and parents. In today's world, the demands of society on the teaching profession are growing day by day, and it is up to the teacher to organize these requirements in practice. A modern school teacher has a number of responsibilities. The teacher is primarily the organizer of the educational process in the classroom. To be successful, every teacher must have pedagogical skills. The basic law of pedagogical skill is to achieve great results with little effort. Creativity will always be his companion. A person who is interested in pedagogical activity, a gifted and talented person develops pedagogical skills. The essence of pedagogical activity is that the teacher, who is creative in nature, forms the student's personality, makes independent decisions in unexpected situations, solves pedagogical problems, independently manages the learning process. It all has to do with the very essence of creativity, the purpose and nature of the work. In educational activities with students, teachers need to involve children in the collaborative process in order to achieve a specific goal. The teacher performs the following tasks in order to attract students to cooperate with him:

- In order for cooperation to take place, the activities that must be organized in the team must be interesting for students, must correspond to the age characteristics and interests of students;

- When involving students in a work, the teacher must give them a pedagogically and psychologically correct task, to guide them;

- When students begin to complete the task, the teacher acts as both a participant and a consultant.

A creative teacher should not only be able to successfully teach and nurture children, learn from the work experiences of advanced teachers, but also have research skills and competencies.

Conclusions

Today's education system requires a modern teacher to be able to use the latest achievements of science and technology, and to effectively use new pedagogical technologies in their professional activities.
