

TODAY'S TEACHER IS THE PINK OF SAMPLE

Aziz Gaffarov

Scientist, Institute of Retraining and Advanced Training of Managers and Specialists of the Public Education System named after Abdulla Avloni

ABSTARCT

At the chairmanship of the education, the head of our state, on August 23, 2019, the deficit of this profession can only increase the reputation of this profession, their self-absorbed work on himself, as an example for others. We now emphasize the lips of teachers in our society, "You need to create an environment that glorifies them as the most future builders," the bright expression of endless respect for the field staff.

Today, the reforms, radical changes in the education system of our country attract the attention of the world community. With the efforts of our head of our state, the problems gathered in education are solving their own, the prestige of the Earth of Earth.

The leader and decisions of the state alone have been identified in the decrees and resolutions adopted alone in the year alone, increase the dignity and prestige of teachers, strengthen their material and spiritual and social protection.

In particular, the decision of decree-3931 about "On additional measures for the improvement of the" Public Education System "adopted on September 5, 2018. Created qualities aimed at making quality changes and improving the skills of teachers.

Today, in a total in 9691 secondary schools in the country, about 450,000 teachers teach young people. Among them is the number of teachers with higher education and is 2.5 percent higher categories.

Decrees and decrees of the head of our state, which can strengthen their material and spiritual and social skills, to make a significant contribution to quality control of public control, the educational institution is a significant contribution to the educational institution. In active parents, graduates, sponsors and other prestige people

It is focused on topical issues such as the formation of supervisory councils that will undoubtedly open bright pages in the public education system of our country. In philosophical language, the education system of our country is moving from one quality to another, ie leaving.

Resolution of the President of the Republic of Uzbekistan dated August 30, 2019 "On measures to improve the system of involvement of youth in science and support of their initiatives" has opened up new opportunities for further strengthening the capacity of existing scientific schools and developing their innovative potential.

According to this decision, the Youth Academy under the Ministry of Innovative Development of the Republic of Uzbekistan was established without the status of a legal entity. Teams of talented young people and students with their innovative projects and ideas, scientists and entrepreneurs under the age of 40 will be admitted to the Youth Academy on a competitive basis.

In particular, the Resolution of the President of the Republic of Uzbekistan dated September 9, 2019 "On measures to organize the activities of the Agency for the Development of the President, Creativity and Specialized Schools under the Cabinet of Ministers of the Republic of Uzbekistan" It is important to take the work on solving problems in the preparation and publication of textbooks and manuals to a qualitatively new level, as well as to create a special system of management and organization of the activities of secondary schools.

From now on, along with the Presidential schools, creative schools, as well as the Muhammad al-Khwarizmi School for Information and Communication Technologies under the Ministry of

Information Technologies and Communications of the Republic of Uzbekistan and the Mirzo Ulugbek Specialized State Secondary School under the Ministry of Innovation Development of the Republic of Uzbekistan. Boarding School and Abu Ali Ibn Sino Boarding School for Young Biologists and Chemists will also be run by the Agency.

Particular attention is paid to the introduction of advanced and transparent organizational and legal mechanisms for the selection, training, retraining and advanced training of teachers in the President, creative and specialized schools with the involvement of international organizations and experts.

It is known that the priority of the Action Strategy for the development of the social sphere is to improve the quality and efficiency of educational institutions through the introduction of international standards for the quality of education and training in order to develop education and science.

Quality and effective education is the basis of new opportunities and innovations in the development of our country. From now on, the teacher will have to focus on the quality and effectiveness of the lesson, to use all the skills in the formation and development of knowledge, skills, competencies and competencies in the subject. Accordingly, it may have an increased wage rate.

Today, special attention is paid to the issues of retraining and advanced training of teachers, the introduction of the most modern, advanced and transparent organizational and legal mechanisms in the system. Therefore, today there is a need for a creative and comprehensive approach to the issues of retraining and advanced training, based on modern requirements. Such a goal can be achieved, of course, by increasing the knowledge and skills of the educator. This process should be the main focus of not only the education authorities, but also the regional centers for retraining and advanced training of teachers.

Today, every educator must have a deep understanding of the changes taking place in the education system of our country, work in response to such revolutionary changes, showing self-sacrifice, and have the skills to work independently.
