

PEDAGOGICAL-PSYCHOLOGICAL METHODS IN PREVENTING FAMILY AND INTER-PERSONAL CONFLICTS

Iroda Rasulova,
Teacher of the Pedagogical Institute of Karshi State University

ANNOTATION:

The article discusses the importance of the decisions taken at the state level in the prevention of violence between individuals and families and the role of pedagogical and psychological recommendations and methods in its delivery to the population. In particular, the importance of developing new methods of rehabilitation and adaptation in today's situation is listed.

Keywords: Violence, family, personality, conflict, pedagogy, psychology.

INTRODUCTION:

Less than six months after her marriage, Nigora's mother-in-law is sitting still. Despite the fact that the boss is also difficult, her husband does not take his side. He joined his mother again and complained to his ailing wife. Is it clear that the mother-in-law is jealous of her son? Nigora's mother insists that she will be patient and that everything will be all right. As her mother-in-law's diya increased, Nigora's son-in-law raised his hand. The son and the mother look for excuses even in the impossible. The last time was the day before he left for his father's house. His mother-in-law said, "My son liked this girl, otherwise he would have taken his sister's daughter to Otabek." Seeing her son coming from across the street, her mother-in-law slammed herself on the doorstep and began to mutter. Dod understood everything from the bride to Dod Nigora's mother-in-law, even if the excuse was insignificant. No more going back to this apartment. The son also believed all his mother's lies and did not send

Nigora home. He said he would never come back and forget about her.

As a result, the young family broke up and divorced.

Yes, because it is white and black, because our fingers are also different from each other, the people between us are also different from each other. The trivial excuses of some adults are that we tie the heads of two young people without looking too far and then grab them by the collar when they hear that they are causing a problem. Some domestic violence is also caused by petty quarrels, resulting in families falling apart.

LITERATURE ANALYSIS AND METHODOLOGY:

Thankfully, the fact that our President is implementing new reforms in this area also helps to eliminate inter-family tensions.

In particular, the Presidential Decree No. PQ-3827 of 2.07.2018 "On measures to improve the system of social rehabilitation and adaptation, as well as the prevention of domestic violence" pleased everyone. It identified priorities for improving the system of social rehabilitation and adaptation, as well as the prevention of domestic violence. Based on the decision, a number of measures are being taken to date. In particular, early prevention of family and interpersonal conflicts, depressive situations, which can lead to suicidal behavior and other factors that negatively affect the spiritual and moral environment in society and the family, as well as the participation of the general public in this process, social rehabilitation and An effective system of cooperation between government

agencies, including civil society institutions, in the settlement of emerging conflicts, especially family conflicts, has been formed. Civil society institutions have been widely involved in improving the system of social rehabilitation and adaptation by providing targeted support to individuals and families. Conflict situations, including the causes of domestic violence, the factors that provoke suicide, were identified and studied, and measures were taken to eliminate them.

With regard to any form of domestic violence in society, the decision was made, first of all, by close relatives to ensure an environment of intolerance, including the inevitability of punishment, support for people in difficult social situations. Raising legal awareness and legal culture in society, strengthening the rule of law in the field of family and interpersonal relations, strengthening the sense of involvement in the process of social rehabilitation and adaptation.

DISCUSSION AND RESULTS:

It is gratifying that special attention is paid to educational institutions in the framework of the program of practical measures for social rehabilitation and adaptation, as well as the improvement of the system of prevention of domestic violence. A mechanism for providing emergency psychological and psychotherapeutic assistance to students of educational institutions in case of detection of mental disorders and behavioral disorders in a particular situation has been developed and introduced. Personnel issues need to be addressed. In particular, psychologists have worked in educational institutions to prevent family and interpersonal conflicts, psychophysical violence and suicidal behavior. The Republican Center for Rehabilitation and

Adaptation of Victims of Violence and Prevention of Suicide has been established.

At present, the center performs the following main tasks and defines them as areas of activity.

First, emergency medical, psychological, social, pedagogical, and legal assistance is provided anonymously to those who are in a difficult social situation, including family problems and domestic violence. Primary and consistent prevention measures are being carried out with individuals who are prone to suicide or who have committed suicide. has established effective cooperation with government agencies, including law enforcement agencies, as well as civil society institutions and citizens, for the early resolution of conflict situations, cases of domestic violence and suicidal behavior.

In organizing the activities of regional state and non-governmental institutions for social rehabilitation and adaptation, strengthening their material and technical and methodological base, formation and support of human resources of these institutions, the creation of a system of counseling for those in need, including through the hotline has been assisting in the establishment of its activities. In order to identify current social problems, periodically study public opinion, based on which programs and guidelines for the elimination of conflict situations, domestic violence and suicidal behavior are developed and implemented. analysis and generalization of conflict situations, domestic violence and suicidal behavior, their causes and conditions, dissemination of information and analytical materials, including in the media and on the Internet. ensured that the public is informed about the problems. Practices, seminars and trainings on conflict situations, domestic violence and suicidal behavior are conducted for employees of public authorities and

administration, law enforcement agencies, non-governmental non-profit organizations.

The fact that centers for rehabilitation and adaptation of victims of violence and suicide prevention have been established in the regional branches of the Women's Committee of Uzbekistan also indicates a comprehensive analysis of the issue. The list of districts (cities) where the centers will be established in the first place is determined by the Women's Committee in consultation with the Council of Ministers of Karakalpakstan and the relevant khokimiyats. The centers work closely with citizens' self-government bodies. This cooperation ensures the timely detection, elimination and prevention of conflict situations, including the use of domestic violence, their consequences, as well as the causes and conditions that lead to this type of behavior. Clearly targeted work is being done to provide effective assistance to people in difficult social situations, primarily through the resolution of family disputes. In order to create an environment of intolerance to any form of domestic violence in society, the aim is to organize awareness-raising activities among the population on the early prevention of conflict situations, including family conflicts.

CONCLUSION:

Undoubtedly the role and influence of the family in the formation of specific spirituality of every nation is invaluable. A polite and smartly hardworking faith is the greatest fortune not only parents, but also of the whole society. We know that in a family relationship, compassion, impartiality, impartiality, and reconciliation, independence, values Independence, values Personal qualities are containing in the family. In this case, the purely and clean films of a person formed the first life knowledge, experience of experience and imagination, first of all in the family. If the

interpersonal conflict means a disagreement between the two people, it will lead to a conflict of conflicts to disagreements in the family, children and their lack of understanding each other. "Carice" is a disagreement or contradictions behind the conflict, hostile, the relationship is hiploma and disclaimer.

It is natural that conflicts in the family are manifested in moral, economic and domestic pressure forms and encouraging partner members of the family;

Initially, the interpersonal relationship will begin to find the component in communication with parents, brothers, sisters, grandmothers andumes. In ancient times, Plato says, continuing the opinion of Socrates; All vices of the earth shall result from the fact that the selfishness of people is primarily due to the fact that the conditions in the family for child rearing are not flat. The extreme love of their children creates conflicts that cause individual, interest, and similar people who are causing people like each other. The younger young generation should be extremely strong moral to itself for itself and to the higher the responsibility to feel responsibly. Similarly, the mood is lacking in many cases. Rejibiations are two different meaning of these words. The first implies that if the second is to bring up, both of them should be used in order to properly raise the child of all their time. By feeding the child, we can see the observer for several years to be taken away from observers for several years, the children of the baby will be given to the disposal of both educators. Interpersonal Confident Tradition The Social Experimates of Everyone is the product of communication processes even the product of the communication processes.
