ANNOTATION

The article analyzes the state's attention to women during the period of renewal in Uzbekistan and the issues of increasing the social activity of women in the ongoing reforms. Also, the theoretical and legal foundations of increasing women's rights and social activity have been studied.

Keywords: state, law, women, reform, activity, development.

INTRODUCTION

The cultural level and spiritual maturity of any society is determined by its attitude towards women. Respecting women and girls, properly assessing their contribution to the development of society, helping them in all matters - all this has been characteristic of our people since ancient times.

Because the present time is a period of great social and political changes, scientific and technological progress. Living and developing society and individuals are constantly interacting with each other. To the extent that a person is shaped by social conditions, society itself is also shaped. When talking about the continuous development of the person, it is necessary to know the personality of the woman, the change and development of her self-awareness and her role in society.

The new stage of social development is characterized by qualitative changes in all spheres of social life, changes in outlook and revision of the value system.

MATERIALS AND METHODS

Reforms in modernizing Uzbekistan have significantly increased the social role of women. Similar trends, the principle of equal rights and equal opportunities for men and women, which is enshrined in Article 46 of the Constitution and reflected in many laws, are also relevant in the Republic of Uzbekistan. In this regard, the international standards of human rights and fundamental freedoms are being followed within the framework of the implementation of the Beijing Declaration and the platform of action for equality between men and women. In order to widely promote and support the social activation of women in the new Uzbekistan, as noted in the 46th session of the UN on Human Rights, it is worthy of recognition that the work aimed at radically increasing the role of women in social and political life and in the field of entrepreneurship should be continued.

RESULTS AND DISCUSSION

In our country, all conditions have been created for women to work according to their ability to show their talents. The degree of use of these opportunities depends on him. If a woman realizes her place

in society not only as a woman, but also as a human being, if she is able to properly direct the abilities given to her by nature, if she considers that the goal of her life is not only to build a family, but to make a worthy contribution to the development of society with honest work, then this woman can definitely be satisfied with her life.

In independent Uzbekistan, women are provided with all the rights and freedoms characteristic of democratic countries. Under the leadership of the President of Uzbekistan Shavkat Miromonovich Mirziyoev, special attention is paid to increasing the social and political activity of women, protecting their health, supporting their aspirations and initiatives, and creating decent working and living conditions for them.

In such a globalized environment, public control groups are organized, problems in women's lives are studied, measures are taken to solve the issues raised by families, and preferential loans are given.

We all know that the address lists of women who want to work have been created, as a logical continuation of this, ensuring their employment, women's family and private entrepreneurship, handicrafts are widely supported.

In order to prevent crimes between women and girls, work is carried out in every part of the neighborhood. The greatest reform is the finding of 2,587 women who are members of religious sects who were released from penal institutions and were removed from the special register last year, finding their place in life, and paying special attention to solving their social problems.

Systematic work is also being carried out to increase the medical culture of women and girls, to provide targeted medical assistance to low-income families, and to further develop the services of national screening and reproductive centers.

4 decisions of the President of the Republic of Uzbekistan, 6 decisions of our Government, 4 orders and 12 programs of measures were adopted, and the legal basis for increasing the socio-political activity of women in the modernizing Uzbekistan and their equal work in all spheres was created. Today, the institutional framework for gender equality is expanding in our country. Meanwhile, within the Senate of the Oliy Majlis of the Republic of Uzbekistan, a new Women's and Gender Equality Committee was established, which is engaged in harmonizing international standards in the national legislation on ensuring women's rights and eliminating any form of discrimination.

As proof of this, the head of our state in his address to the Oliy Majlis entrusted the committee with the task of providing women's employment, especially 13,000 women who have fallen into a difficult social situation with jobs and 1,600 women with homes, and the committee has defined specific plans in this regard. , it is true that practical work is being carried out.

Every year, 1,600 women are given practical help to form the initial contributions of the housing sum from the funds of the fund.

Necessary measures are being taken to provide financial assistance to women with disabilities from the funds allocated for the public fund for women and family support, and to provide them with means of rehabilitation.

CONCLUSION

In conclusion, it is necessary to convey and promote to the general public the essence of the reforms implemented in our country regarding the support and development of the state policy regarding women. Therefore, in order to further strengthen the role of women who are politically active, with mature spirituality, and are an important pillar of society, the following is suggested: first, in order to strengthen the participation of our women in state and society management, it is necessary to convey

the programs of political parties to the general public. Secondly, it is necessary to convey programs in mass media that increase political and legal knowledge in popular language.

Thirdly, special attention should be paid to increasing the legal literacy of women in the family. In order not to become a victim of family violence, it is the need of the time for our girls to be morally high along with their rights.
