

THE MAIN DIRECTION OF REFORMS IN UZBEKISTAN IS PEACE AND STABILITY

Mamatkobilov Tursunmurod Doniyorovich

Academy of the Armed Forces of the Republic of Uzbekistan

Associate Professor of the Department "of National Pride and Military Patriotism",

Candidate of Political Sciences

Khudaiberganov Kudrat Bazarbaevich

The Department "of National Pride and Military Patriotism", Post Officer Colonel

Annotation:

Life itself shows that it is necessary to raise the human factor through the issue of achieving justice in the legal system, ensuring citizens' confidence in the future, impartial assessment of the activities of state bodies. "Holy Motherland, to defend it is an honorable duty!" put forward important principles of the idea and factors of civic duty.

Keywords: suggestion and implementation of the ideas of the Holy Motherland, responsibility, spirituality, enlightenment, peace and stability in the minds of young people.

Socio-political, spiritual, educational and trade and economic issues are becoming increasingly important in the context of large-scale reforms in the renewed Uzbekistan. That is why our President, Supreme Commander of the Armed Forces Shavkat Mirziyoyev pays attention to maintaining peace, stability and humanism in improving the status and position of Uzbekistan in the world community. Peace and stability is always of prime importance to the life of the people, the dream of every person living in our country. This issue is always put on the agenda as the most important aspect of increasing the efficiency of tasks in this regard. From the point of view of social policy, the issues of creating jobs on the ground, opening wide opportunities for the development of entrepreneurship and private property, caring for young people, women, the elderly and the disabled, attention is paid to socially disadvantaged families are reflected in the adopted state program. And also, in accordance with our subsequent plans for the future, Uzbekistan is boldly moving from national revival to national progress. Decree of the President of the Republic of Uzbekistan, Supreme Commander-in-Chief of the Armed Forces Shavkat Mirziyoyev PQ-3898 dated August 4, 2018 "On the radical improvement of the system for increasing the moral and educational level of the military personnel of the Armed Forces of the Republic of Uzbekistan" and the moral and educational work being introduced on this basis in the system of the Armed Forces in accordance with the concept of increasing security "Holy Motherland, defending it is an honorable duty!" an idea was put forward[1]. Also, in the system of the Armed Forces, every Friday of the week is defined as the "Day of Spiritual Growth and Patriotism", which is necessary to encourage the moral and spiritual training of military personnel. The goal is to defend with devotion the sovereignty of our country, the territorial integrity and peace of our people, which is recognized as the highest task.

Large-scale reforms are being carried out in our country aimed at strengthening peace and stability, ensuring human rights, freedoms and interests, comprehensive development of our country, and increasing its authority in the international arena.

Therefore, based on the meaning and content of the reforms carried out within the framework of the seven priority programs and plans defined in the Development Strategy of the Republic of Uzbekistan for 2022-2026, this state program is **“The Year of Ensuring Human Interests and Development of the Mahalla”, “Prosperous Village”, “Prosperous Neighborhood”, “Every Family is an Entrepreneur”, “Youth is Our Future”, “Five Positive Initiatives”**, the main ideological provisions of this decree include the issue of bringing the human factor to a higher place.

We are convinced that the policy of Uzbekistan, which is following the path of developing a democratic state of law and a fair civil society based on a free market economy under the leadership of the President of Uzbekistan Shavkat Mirziyayev, is aimed at developing society. The activities of public organizations, political institutions and the media on the implementation of comprehensive reforms aimed at liberalizing public administration, improving state and public construction are synchronized with today's processes. The fact that the state and its policy are focused only on the benefit of the people, on ensuring peace and a stable life for the citizens of the country, is reflected in the adopted laws, decrees and resolutions of the President and is being implemented. This has a positive effect on the spiritual, educational, moral thinking and worldview of the citizens of the country, and also determines the material and cultural image of society. That is why it creates the possibility of harmonizing relations between the state and the citizen, the government and the population on the basis of justice. Under the leadership of the head of our state, our people live peacefully, positive economic transformations are taking place in our country step by step. New opportunities are opening up for enterprising, knowledgeable, hardworking people.

The principle is widely applied in life, not the people should serve the state bodies, but the state bodies should serve the people. Life itself shows that it is necessary to raise the human factor through the issue of achieving justice in the legal system, ensuring citizens' confidence in the future, impartial assessment of the activities of state bodies.

Ensuring the viability and enforcement of adopted laws should become a priority in society. At present, in the state and non-state sectors, as well as in all industries, there is a need for people of specialists, workers who are quickly involved in economic reforms, personnel who know world technologies and techniques and are responsible for the requirements of market relations for the necessary modern economy. Therefore, an important task is the transition from general production to production based on advanced technologies, increasing the volume of exports of products, training personnel who think in a new way in modern market conditions.

In Uzbekistan, at the initiative of the President, every Thursday of the week is declared a day for the prevention of offenses, offsite court hearings are held. The establishment of a system of open and effective communication with the people is proof of the manifestation of democratic principles in practice. [2]

Deepening and expanding the scale of structural reforms, modernizing the economy, ensuring stable and balanced macroeconomic indicators, making investments, developing free economic zones, strengthening the private property sector and further improving the favorable environment for doing business, employment of the population can be called an important condition for solving problems. An important factor determining the development of our country is recognized as the large-scale reforms carried out by our state in the field of ensuring income and living standards for the population, and the comprehensive promotion of exports.

Now members of the Senate of the Oliy Majlis and deputies of the Legislative Chamber meet with their constituents in the last ten days of each month and develop measures to legally solve the problems that worry the population, and the fact that the authorities are not indifferent to the appeals of citizens creates the basis for people to live with a sense of ownership of the changes happening in society. For now, a consistent continuation of a well-thought-out tight monetary policy is seen as an important job creation issue.

The modern world is experiencing an information onslaught. For this reason, obtaining information is becoming one of the most urgent problems in the minds of the population. At present, when analyzing the interests, sentiments and social status of all individuals and social groups, it remains an important issue to ensure employment with the work of the unemployed. The development of the non-state sector is also one of the most important effective means. Because the non-state sector is considered as a starting link in the formation of civil society. In these processes, a person acts as a subject of society in solving his social problems.

It must be admitted that due to our inattention, indifference and some shortcomings in our work, some young people fall under the influence of criminal gangs, extremists and alien, destructive ideas. Huge creative work is being carried out throughout Uzbekistan. Cities and towns - the appearance of our villages is becoming more beautiful day by day, affordable housing and infrastructure networks are being built for the population based on exemplary projects. The supply of renewable electricity, clean drinking water and natural gas is improving. Don't you say that there is an abundance in the markets and shops, and that our tables are full? All this, first of all, thanks to our thirty-two years of independence, as well as peace and tranquility reigning in our country. Taking these opportunities from public policy encourages all of us to live with loyalty and dedication.

Ensuring security, interethnic harmony and religious tolerance in our country is considered a priority of our state policy. Representatives of more than 130 nationalities and peoples living in our country have united in 138 national cultural centers and live peacefully as children of a large family under the slogan "Uzbekistan is our common home." This is based on a great humane and democratic policy. In accordance with the Decree of the President of the Republic of Uzbekistan dated May 19, 2017, the Committee on International Relations and Friendly Relations with Foreign Countries was established under the Cabinet of Ministers. The main goal of this is the consistent continuation of the state policy aimed at ensuring interethnic harmony and tolerance in our society.

We must always be aware and vigilant at the present time, when the process of globalization has intensified in the world, competition and mutual contradictions are growing on a global scale, threats such as radicalism, terrorism, extremism, proselytism and "mass culture" are growing. Life itself requires us to further increase our mobilization by vigilance with the ideas **"Protect your home", "Protect your child"**. To ensure the inviolability of the country's borders, to strengthen the combat potential of our Armed Forces, we need to literally educate our boys and girls in the spirit of patriotism[3].

Also, the presence of our state in today's socio-political arena, the organization of charitable and auxiliary activities by selfless people of our people, shows humanistic feelings in accordance with the principles of the reforms being carried out in our country.

As a result of a large-scale reorganization of the Armed Forces of Uzbekistan, we are proud of our great ancestors, national heroes, such as Shirok, Tomaris, Jalaluddin Manguberdi, Temur Malik, Najmuddin

Kubro, Amir Temur, Babur, and show their courage as an example of our youth. The system of the Armed Forces has been significantly improved in organizational and structural terms [4].

The mobility of structures, combat capability, physical and moral training of military personnel have increased. Units and subunits are equipped with modern weapons and military equipment. The high combat effectiveness of the Armed Forces is the most important principle of uniting the people of Uzbekistan and educating every citizen in the spirit of patriotism through the development of economic, political, strategic, military-technical and scientific power. Therefore, strict discipline, spiritual and educational thinking raises the spirit of the younger generation thanks to the large-scale work carried out in the military sphere.

The current task should be aimed at promoting the feeling of the development of the Motherland, the well-being of people, peace in the country, the ideas of social cooperation based on the principle from the Action Strategy to the Development Strategy. We must ensure that every citizen living in our country is dedicated to his profession through responsibility and duty.
